PROFESSIONAL SUMMARY

Results-driven Software Engineer and ICT professional with a BSc (Hons) in Software Engineering and hands-on experience across full-stack development, database administration, and ICT education. Skilled in building and deploying web and mobile applications, leading technical teams, and delivering enterprise ICT solutions. Currently advancing expertise through an MSc in Information Technology at Starz University, with a strong focus on AI, cybersecurity, and cloud computing. Proven track record of technical leadership, student mentorship, and cross-functional collaboration.

CORE SKILLS

Languages: Java • Python • PHP • JavaScript • HTML/CSS • SQL

Frameworks: React • React Native • Node.js • Express.js • Django • Laravel • Flutter

Databases: MySQL • SQLite • Firebase • Hive Database

Tools & Platforms: Git/GitHub • VS Code • Android Studio • XAMPP • Microsoft Office • Google Workspace

Core Competencies: API Development • Database Design • Software Testing • System Analysis • Cloud Computing • Cybersecurity Fundamentals • Agile Development • Digital Operations & Virtual Assistance

PROFESSIONAL EXPERIENCE

Senior Software Engineer / Director of ICT Services | WellDone Group Inc.

Monrovia, Liberia

- Lead software development initiatives and design enterprise technology solutions.
- Develop web and mobile applications for internal and client-facing use.
- Coordinate ICT projects and digital transformation strategies across the organization.
- Provide technical leadership and mentorship to development staff.

Senior Software Engineer | BridgeNovaX

Monrovia, Liberia

- Developed software solutions aligned with business goals and stakeholder requirements.
- Participated in ERP planning and digital product development.
- Coordinated software architecture design and implementation.

ICT Lecturer | Faith University College of Liberia

Monrovia, Liberia

- Delivered lectures in Digital Media, Artificial Intelligence, Cloud Technology, Cybersecurity, and Mobile Application Development.
- Mentored undergraduate students in software engineering and real-world ICT applications.
- Developed course materials and practical sessions to strengthen technical skills.

ICT Lecturer | Apex University of Liberia

Monrovia, Liberia

- Taught Computer Concepts and Application, and Mobile Application Development to undergraduates.
- Guided and supervised student projects in system design, development, and research.
- Promoted digital literacy and practical technology use among students.

ICT Trainer | Monrovia District Vocational Training Center (MDVTC)

Monrovia, Liberia Designed and delivered hands-on ICT and Web Design training programs.

- Trained students in computing, programming fundamentals, and digital tools.
- Supported skills development for employment and entrepreneurship.

Software Engineering Intern | N@tcom Training Center

Kigali, Rwanda • January 2025 – February 2025

- Built front-end and back-end features using HTML, CSS, Java, PHP, React.js, and Python on real-world projects.
- Contributed to partnerships with government bodies, civil society organizations, and international agencies supporting anti-corruption initiatives.
- Strengthened coding and problem-solving skills through exposure to industry best practices.

Software Engineering Student Representative | UNILAK – LIBSAR

Nyanza District, Rwanda • November 2024 – 2025

- Represented Software Engineering students' interests to university stakeholders.
- Organized events to foster community among international students and improve support services.
- Led department initiatives over a 2-year term, including a departmental seminar.
- Coordinated a final project presentation recognized by the university panel for innovation and teamwork.

EDUCATION

MSc in Information Technology — Starz University, Liberia

In Progress

BSc (Hons) in Software Engineering, Second Class Upper Division — University of Lay Adventists of Kigali (UNILAK), Rwanda

2021 – 2026

High School Diploma & WASSCE Certificate — Haywood Mission Institute, 2021

CERTIFICATIONS & TRAINING

- Back-End Software Development Certificate – N@tcom Training Center, Rwanda, 2025
- Web Development Certificate (HTML, CSS, JavaScript, Git/GitHub, Python, Responsive Design) – N@tcom Training Center, 2025
- Software Development Certificate – ALX Africa, 2025
- Professional Foundation Certificate – ALX Africa, 2024
- Virtual Assistant Certificate – ALX Africa
- Certificate of Recognition – LIBSAR Department Representative, UNILAK, 2024

KEY PROJECTS

- Smart Water Level Monitoring System — ESP32-based IoT solution with GSM SMS alerts and a PHP/MySQL backend for real-time monitoring.
- Student GPA Calculator System — Student management, course registration, and automated GPA computation.
- Student Alumni Management System — Alumni database with administrative dashboard and records management.
- Finance Management Application — Mobile app for expense tracking and financial reporting.
- E-Commerce Platform — Product and customer management with integrated payments.
- National Farmer Registration System — Farmer Management, register of record for every farmer, farm and holding across the fifteen counties.

LEADERSHIP & ACTIVITIES

- Led a multidisciplinary team of 6 students in designing and developing an IoT-based smart water management system.
- Directed ICT services and mentored technical staff at WellDone Group Inc.
- Served as University Lecturer and ICT Trainer across three institutions.
